

STEM Mentor Program at the Christa McAuliffe Center @ FSU

For STEM Mentor Program mentees and mentors:
Join us for a unique experience to have fun while learning a little about the ISS and one another!

Mentors and mentees will work together conducting a simulated mission to the International Space Station to help rebuild damaged satellites and conduct scientific research while ensuring the safety of our astronauts in low Earth orbit. You may encounter emergencies or unexpected problems that require critical thinking and decision-making skills to find resolutions. Teamwork is crucial – if one member of the team fails to complete his or her job, the entire mission may be at risk. Please let your mentor/mentee know that you are registering and invite them to join you!

>>Wednesday, October 24, 2018 5:30PM – 7:00PM<<

The Christa McAuliffe Center @Framingham State University
100 State Street, Framingham MA
